PUBLIC NOTICE

ROAD SAFETY ALERT: CHAMWINO–DODOMA ROAD CONSTRUCTION PROJECT

The Tanzania Roads Agency (TANROADS) informs all road users and the general public that construction works have commenced on the 32-kilometre Chamwino–Dodoma Road improvement project, beginning in the Ihumwa area.

As construction progresses, road users are urged to exercise caution and strictly observe all traffic and safety instructions within the project area. In particular, motorists and other road users are required to:

- **Observe all temporary traffic signs and road markings.**
- **Follow directions issued by traffic controllers and road safety officers.**
- **Use designated traffic lanes and alternative routes where instructed.**
- **Reduce speed when approaching and passing through construction zones.**
- **Maintain a safe distance from construction equipment, machinery and active work areas.**

TANROADS further informs the public that temporary changes to traffic arrangements may be introduced at different sections of the road to facilitate construction activities. Road users are therefore advised to remain alert, exercise patience and cooperate with traffic management personnel to ensure the safety of everyone.

TANROADS appeals for public cooperation and understanding throughout the construction period, as these works are essential to improving road infrastructure and transport services.

Issued by:

Public Relations and Communication Unit,
Tanzania Roads Agency (TANROADS).
