

# TERMS OF REFERENCE FOR DESIGN REVIEW AND SUPERVISION OF REHABILITATION AND UPGRADING OF IRINGA AIRPORT

## 1. BACKGROUND

The Government of the United Republic of Tanzania has received a credit from the International Development Association (IDA) in the Financial Year 2022/23 towards the cost of the Tanzania Integrated Transport Project (TanTIP). It is intended that to apply part of the proceeds toward the cost of Consultancy Service for Design Review and Construction Supervision of Terminal Building at Iringa Airport.

### 1.1. Description of the Airport

Iringa Airport has a tarmac-surfaced runway oriented at 02/20 (1679m x 30m) with PCN 15/F/B/Y/U and taxiway and an apron surfaced by tarmac with a PCN 15/F/B/Y/U. The Runway is covered by tarmac, a taxiway (75mx 75m), and an apron (318mx38m). The Airport (IATA: IRI, ICAO: HTIR) is currently serving domestic flights and is located about 17kilometres (11 miles) northeast of Iringa Municipality. The airport's single runway lies parallel to the A104 trunk road. The aerodrome is elevated at 4678FT AMSL and the reference temperature is 24.3°C.

The original design of Iringa Airport was completed in 2017 by Yooshin Engineering Corporation of South Korea in association with Intercontinental Consultants & Technocrats Pvt (ICT) of India and M/s Hyewonkaci Architects of South Korea.

## **1.2 Description of the Works**

The Airport will be upgraded to a full fledged Code 3C. The works to be implemented will involve construction of a new Passenger Terminal Building with a Control Tower on top, all with necessary operational equipment and furniture, supply and installation of MET facilities, construction of asphalt paved Access Road and car parking.

## **2 OBJECTIVES OF THE ASSIGNMENT**

The main objective of this assignment is to undertake a Consultancy Services for the construction of Terminal Building at Iringa Airport. The specific objectives of the Consultancy services are as follow: -

- (i) Design review of the Passenger Terminal Building which includes a tower cabin at the top and Meteorological (MET) facilities.
- (ii) Review of design drawings and update where necessary and advice the client on possible changes or conflicts.
- (iii) Design Review of access road and car parking.
- (iv) Supervision of the works contract to ensure that the works comply with the approved design, drawings, specifications, conditions of contract and sound engineering practice.
- (v) Supervision of maintenance activities during the Defects Liability Period.

The main objective of the assignment is to carry out Supervision of the implementation of the rehabilitation works to completion and during the Defects Liability Period.

## **3 SCOPE OF CONSULTANCY SERVICES**

The Consultant is expected to perform all necessary duties as required to achieve the above objectives. In doing so, the Consultant shall provide key and back up staff as required in the TOR and exercise all necessary engineering, surveying, testing, quantity/ quality and financial control of the works in accordance with the respective Contract. The specific scope of the assignment shall include but not limited to the following activities: -

### **3.1 Design Review**

The purpose of this review is to ensure that the documents and data are correct, complete and conform to the international acceptable standards, IDA and National Guidelines. The Consultant will be required to study the existing airport design and come up with cost-efficient suggestions on how to improve the airport facilities. In addition, the Consultant shall be required to carry out the following activities:

- i. Review the design of Passenger Terminal Building including control tower and its facilities, MET facilities, Access Road and car parking; and
- ii. Review of existing design drawing and update them where necessary

### **3.2 Construction Supervision Services**

The Consultant shall be fully responsible for the supervision of the rehabilitation works in accordance with the FIDIC Conditions of Contract. The Consultant shall, in general, exercise the powers of the Engineer in all matters concerning the contract and the execution of the works. He shall supervise the construction works with due diligence, efficiency and in accordance with sound technical, administrative, financial, socially responsive, environmentally sound and economic practices. He shall perform all duties associated with such tasks to ensure that only the best construction practices are followed and that the final product is in all respects equal to, or better than that specified, at the most economic costs and is carried out in full compliance with the governing specifications.

In particular, the Consultant's duties and responsibilities shall include but not be limited to:

- i. Receive, analyze and approve the Contractor's program of works prior to the commencement of construction activities. The consultant shall provide appropriate and timely inputs to the program where required to ensure that construction works are implemented using effective and realistic plans and schedules considering working on live Airport.
- ii. Monitoring of Contractor's mobilization progress for staff, equipment and materials and providing appropriate advice when required to facilitate the process.
- iii. Study the available designs, specifications, drawings and other relevant documents and propose modifications where necessary as agreed with the Client.
- iv. Receive and reviews the contents and amounts of all relevant Insurance Certificates submitted by the Contractor as required by the Works Contract and advise the Client accordingly.
- v. Receive and verify the Registration Cards of key equipment and plants mobilized on-site by Contractor for the execution of Works before submitting the same to the Client.
- vi. Ensure the correctness of beacons and benchmarks for setting out of works, and cause Contractor to re-establish the missing ones where needed in accordance with the works requirements and agreed specifications.
- vii. Check and approve the contractors setting out of the works,

- viii. Inspect sources, and verify the quality of borrowed pits and quarries or any other naturally occurring materials for incorporation into the works and monitor their compliance with specifications and national environmental regulations and laws,
- ix. Prepare a quality assurance plan, in consultation with the Contractor, including arrangements to check the quality of materials brought to the site, to ensure that the quality of construction is consistent with the technical specifications, and to maintain test records.
- x. Review the Contractor's submissions of relevant suppliers and specifications of the equipment and facilities to be supplied; including supervision of installation, testing and commissioning of the same.
- xi. Coordinate and ensure that relevant training by suppliers to the Engineers and Technicians is conducted for each equipment as specified in the Works Contract; and ensure that operational and maintenance manuals are availed to the Client.
- xii. Measure or verify quantities of completed works and prepare monthly interim payment valuations for the Client's review and payment.
- xiii. Keep and update all records including reports, works diaries, correspondences, instructions given to the contractors, test records, measurements and quantity calculations, payment records and all other relevant documents pertaining to the works and supervision contracts.
- xiv. Perform routine design review during the construction stage and propose appropriate changes when necessary. All design changes that affect the quality, scope, cost or completion period of the works are subject to prior consultation and approval from the Client.
- xv. Organize and keep records of monthly site meetings between Contractor and Consultant to discuss the progress of works, challenges encountered and the ways forward. The Client will also be attending the meetings when found necessary.
- xvi. Prepare consolidated monthly reports on physical and financial status, site meetings, contractual matters, etc. with recommendations for action by the Client. The reports shall be submitted in hard and soft copies and shall include chart-supported analysis on physical and financial slippage and requirements to remedy delays.
- xvii. Coordinate with all relevant parties in ensuring that the Environmental Management Plan and any applicable Tanzanian environmental laws, permits and regulations are adhered to during the execution of the project.
- xviii. Perform routine and periodic comparison between the works' schedules and the actual progress of works, and cause the Contractor to review the program whenever the previous program is inconsistent with the actual works on site or with the Contractor's obligations.

- xix. Recording, examining and evaluating all claims submitted by the Contractor, and submit appropriate information within the timeframe indicated in the Conditions of Contract for the Client's consideration. The Consultant's determination on the Contractor's claims and subsequent submission of the same to the Client is expected to include at least the following information:
  - a) Description of the claim
  - b) Source and reason of the claim
  - c) Consultant's evaluation and opinion on the legitimacy and the scope of the claim
  - d) Consultant's conclusions and recommendations on the claim
- xx. Assist the Client in the claim rebuttal process and provide support if required in the Arbitral procedure
- xxi. Prepare and submit to TANROADS the final account of executed works
- xxii. Check and compile As-built drawings prepared by the Contractor.
- xxiii. Prepare a draft final report within one month after completion of the works, including a financial summary. A summary of works is to be compiled comparing the executed works versus the original contract estimate together with a full justification for any variance between the two. The final report will be produced after acceptance and approval of the draft final by the Client.
- xxiv. Provide appropriate instructions and guide to the Contractor in order to protect, store or secure a part of the completed or on-going works against any serious deterioration, loss or damage.
- xxv. Preparation and submission of detailed progress report (soft and hard copy) with updated cost of the civil works contract, implementation schedules and any substantiated request related to additional funding, needed for full completion for the project. The Report shall be prepared when the implementation of the civil works contract reaches a value of 50% and 80% of the initial construction contract.
- xxvi. Receive, review (give recommendations if any) and submit Maintenance Manuals.
- xxvii. Determine and agree with the contractor on the rates of new works in the Contract (if any) and seek prior approval from the Client on the agreed rates.
- xxviii. Prepare a draft provisional acceptance certificate of the works
- xxix. Facilitate the preparation, review and approve as-built drawings of the Terminal Building, Access Roads and Car Parking prepared by the Contractor.
- xxx. Organizing and undertaking on the job training to the selected counterpart staff. The Client will attach technical staff to work with Consultant during the execution of the works contract. The training will cover all key aspects of supervision of airport works including scheduling of works, quality control of materials and completed

works, setting out and measurement of works, and preparation of as-built drawings and final completion/project's report.

- xxxi. Provide appropriate capacity building for TANROADS Engineers in accordance with the content and the programme submitted to and approved by the Client (See section 3.5 of the TOR).
- xxxii. Review and approve the contractor's safety arrangements and participate in semi-annually aviation stakeholders' consultative meetings to address concerns of the airport and ensure that Contractor comply with aviation-related applicable regulations/ rules such ICAO Policy/Rules/Regulations.
- xxxiii. The Consultant shall provide any other additional services if so requested by the Client, at rates and under conditions to be mutually agreed which fall within general ambit of these Terms of Reference.
- xxxiv. The Consultant shall ensure that the Contractor's ((Environmental, Social, and Health and Safety - ESHS) ESHS performance is in accordance with TANROADS Environmental, Social, and Health and Safety (ESHS) Code of Conduct (accessible through <https://www.tanroads.go.tz/policies>), Contractor's ESHS obligations and good international industry practice. The ESHS related services include but are not limited to: -
  - a) Review and approve the Contractor's Environment and Social Management Plan (C-ESMP) prior to any construction works, including all updates and revisions (within a reasonable time and prior to any significant works that would be covered by the proposed material changes) in consultation with the Environmental, HS or Social specialists of TANROADS;
  - b) Review and approve the Contractor's OHS Plan
  - c) Monitor the implementation of the Contractor's ESHS requirements, including impact mitigation and monitoring measures, during the construction of the works,
  - d) Ensure that the Contractor's insurance is in place and valid at all time and that incidents are reported by the contractor promptly
  - e) Review and approve ESHS provisions of method statements, implementation plans, Gender Based Violence (GBV)/ Sexual Exploitation and Abuse (SEA)prevention and response action plan, drawings, proposals, schedules and all relevant Contractor's documents;
  - f) Review and consider the potential ESHS risks and impacts of any proposed design change proposals and advise if there are implications for compliance with ESIA, C-ESMP, consent/permits and other relevant project requirements;
  - g) Undertake audits, supervisions and/or inspections of any sites where the Contractor is undertaking activities related to the Works, to verify the Contractor's compliance with ESHS requirements including its GBV/ SEA

obligations, with and without contractor and/or client relevant representatives, as necessary, but for GBV related issues not less than once per month,

- h) review the Contractor's EHS workers training and related materials and activities related to workers whom predominate language is Swahili,
- i) Develop and maintain ESHS checklists and supervision reports related to audits and inspections related to Contractor's ESHS compliance and performance and support TANROADS in preparing the Root Cause Analysis and Safeguards Corrective Action Plan reports;
- j) Routinely review and undertake audits and inspections of Contractor's worker EHS training records, accident logs, community liaison records, EHS inspection and monitoring findings and other ESHS related documentation, as necessary, to confirm the Contractor's compliance with ESHS requirements;
- k) Promptly report any identified non-compliance issues to Construction Contractor and TANROADS and work with these entities to define acceptable remedial action/s and their timeframe for implementation in the event of a noncompliance with the Contractor's ESHS obligations remedial action/s and their timeframe for implementation in the event of a noncompliance with the Contractor's ESHS obligations;
- l) In the case of any significant or material ESHS incident (such as death or seriously accident, significant spill, pandemics like COVID 19 etc.), report within one day of knowledge of such event to TANROADS and work to define acceptable remedial actions to investigate, remediate and prevent such events in the future (**see Section 7.0 for related reporting**),
- m) In relation to all significant material and service providers to the Contractor (such as sites/provides of road base and fill materials, construction waste disposal services and sites), undertake site visit and assessment of such material and service providers in terms of potential significant ESHS issues
- n) Ensure appropriate representation at relevant meetings including site meetings, and progress meetings to discuss and agree appropriate actions to ensure compliance with ESHS obligations;
- o) Review and critique, in a timely manner, the Contractor's ESHS documentation (including regular reports and incident reports) regarding their accuracy and efficacy;
- p) Undertake liaison, from time to time and as necessary, with project stakeholders to identify and discuss any actual or potential ESHS issues,
- q) On behalf of TANROADS, establish and maintain a grievance redress mechanism with support of the Contractor, including types of grievances to be recorded and how to protect confidentiality e.g. of those reporting

allegations of GBV/SEA.

- r) Ensure any GBV/SEA instances and complaints that come to the attention of the Consultant are registered in the grievance redress mechanism and resolved,
- s) Prepare and submit to TANROADS, as part of monthly progress report, issues on ESHS project construction compliance and performance (see Section 6 for details)
- t) Upon completion of project construction or closure of any specific work area or camp site, perform an inspection of such site/area to ensure Contractor compliance with ESHS requirements and whether there are any existing unmitigated ESHS impacts, and if issues are identified then promptly notify the Contractor and TANROADS and work with such entities to define acceptable remedial actions to resolve all issues

### **3.3 Defects Notification Period**

The Consultant shall supervise maintenance of the works (including the administrative aspects of the works) during the Defects Notification Period. For purposes of fulfilling the Consultant's obligations during the Defects Notification Period (DNP), the Resident Engineer will carry out an inspection including receiving feedback from the airport manager, of the works and equipment and subsequently prepare and issue the final certificate.

During DNP, the Consultant shall be expected to draw the attention of the Contractor to any defects as soon as such defects are noticed and reported and shall supervise the subsequent remedial works (quality of works, materials, and workmanship). As the liability period for the Contract is 12 months, an inspection will be carried out in an interval of 3 months after completion of the total works and any deficiencies noted on the completed works and its remedial measures proposed to the Contractor. Depending on the nature of the deficiency, repair work will be carried out under the Consultant's supervision.

The Resident Engineer shall also exercise his duties by amicable resolving disputes over any defects and remedial works before the end of defects liability period. Any disagreement on such disputes should, immediately, be referred to the DAAB for hearing and adjunctions

At the end of the 12-month notification period, a final inspection will be carried out under the supervision of the Resident Engineer who will prepare and sign the Inspection Report and distribute it to the Contractor, TANROADS HQ, Regional Manager Iringa Region and Iringa Airport Manager.

### **3.4 Training**

The Consultant shall organize and undertake theoretical and on-the-job training for at least three Engineers. The Engineers will be seconded to the Consultant by TANROADS during the execution of the works contract. The training is expected to cover all aspects of supervision of airport rehabilitation contract including:

- (i) Review of airport design;
- (ii) Setting out and measurement of works;
- (iii) Quality control of materials and completed works;
- (iv) design review, installation and supervision of equipment installation and commissioning
- (v) Preparation of As Built Drawings; and
- (vi) Preparation of project's and final completion reports.

#### **4.0 PROFESSIONAL KEY STAFF**

The Consultant shall provide qualified Professional key staff for the assignment, prepare a work program, manning schedule and corresponding staff input as required for the execution of the services. The Consultant shall employ only such key staff whose CVs have been approved by the Client. In addition to the expert personnel, the consultant shall determine the support staff to assist with the on-site supervision of the works. The Consultant must provide in the proposal, CVs and copies of the highest education certificates for all proposed professional key staff.

The estimated number of professional Key staff –months required for executing the assignment are **129.5 staff months**. The desirable inputs of the key staff are provided as follows

<b>Stage</b>	<b>Estimated Staff months for Consultancy Service for Design Review and Construction Supervision of Terminal Building at Iringa Airport.</b>	
<b>A</b>	<b>During Design Review</b>	
	<b>Key Position</b>	<b>Staff Month</b>
1.	Team Leader/Resident Engineer	2
2.	Drainage/Structural Engineer	2
3.	Topographic/Land Surveyor	2
4.	Electrical Engineer	1.5
5.	Quantity Surveyor	1.5
6.	Environmentalist	1.5
7.	Sociologist	2
	<b>Sub-Total 1</b>	<b>12.5</b>
<b>B</b>	<b>During Construction Supervision</b>	
	<b>Key Position</b>	<b>Staff Month</b>
1.	Resident Engineer	18
2.	Materials Engineer	15
3.	Drainage/Structural Engineer	12
4.	Topographic/Land Surveyor	16
5.	Electrical Engineer	8

6.	Electromechanical Engineer	8
7.	Quantity Surveyor	15
8.	Environmentalist	8
9.	Sociologist	8
10.	Health and Safety Officer	6
	<b>Sub-Total 2</b>	<b>114</b>
<b>C</b>	<b>During Defects Notification Period</b>	
	<b>Key Position</b>	<b>Staff Month</b>
	Resident Engineer	2
	<b>Sub-Total 3</b>	<b>2</b>
	<b>TOTAL</b>	<b>128.5</b>

The following is a list of the proposed professional key staff with qualification and experience requirements:

#### **4.1 Resident Engineer:**

The Resident Engineer (RE) shall be a Registered or Chartered Civil Engineer with at least a degree in Civil Engineering. A postgraduate degree in Airport Engineering is an added advantage.

He/ She must have at least 15 years of cumulative experience related to airport design and construction supervision. The RE must have served in at least two (2) airport projects in similar capacity and similar nature, magnitude and complexity in the last ten (10) years. Experience in contract administration under FIDIC Conditions of Contract in at least one (1) project. She/he must be conversant with IATA, British and ICAO Standards.

She/he must have a working experience of at least 3 years in Developing countries. Proficiency in written and spoken English is mandatory.

#### **4.2 Materials Engineer**

Material Engineer must be a registered Civil Engineer with a degree in Civil Engineering or Pavement or Materials Engineering. Postgraduate qualification in Pavement or Materials Engineering is an added advantage.

She/he must have a minimum of ten (10) years of specific experience in Pavement/Materials matters related to roads/airport works. She/he must have served in a similar capacity in at least two (2) airport projects of similar magnitude and complexity in the last 10 years. Conversant with British Standards.

She/he must have a working experience of at least 3 years in Developing countries. Proficiency in written and spoken English is mandatory

### ***4.3 Drainage/Structural Engineer***

The Drainage Engineer must be a Registered Civil Engineer with a degree in Civil Engineering.

She/he must have at least ten (10) years of general experience in design or construction supervision of Building works. She/he must have served in a similar capacity in at least two (2) projects of similar magnitude in the last 10 years. He/She must be conversant with British Standards.

In addition, He/she must have a working experience of at least 3 years in Developing countries. Proficiency in written and spoken English is mandatory

### ***4.4 Topographic/Land Surveyor***

She/he must be a registered Land Surveyor. She/he must possess a minimum of a Diploma in Land Surveying.

She/he must have at least eight (8) years of cumulative experience in design and/or construction of buildings or roads. She/he must have served in at least two (2) construction projects of similar magnitude in the last 10 years.

In addition, He/she must have a working experience of at least 3 years in Developing countries. Proficiency in written and spoken English is mandatory.

### ***4.5 Electromechanical Engineer***

Must be a registered Engineer with a degree in Mechanical Engineering or related field.

She/he must have at least 10 years of general experience in mechanical installations in buildings of similar magnitude and complexity. She/he should demonstrate experience in the design and supervision of similar works in at least three (3) building projects of similar nature and magnitude.

In addition, He/she must have a working experience of at least 3 years in Developing countries. Proficiency in written and spoken English is mandatory.

### ***4.6 Electrical Engineer***

Electrical Engineer must be a Registered Engineer with a degree in Electrical Engineer.

She/he must have at least at least 10 years of general experience in electrical works.. She/he should demonstrate experience in the design and supervision of Electrical works in at least three (3) buildings projects of similar magnitude. He/she must also be conversant with British Standards.

In addition, He/she must have a working experience of at least 3 years in Developing countries. Proficiency in written and spoken English is mandatory

#### ***4.7 Quantity Surveyor***

The Quantity Surveyor shall have a degree in Quantity Surveying or Building Economics or related field from a recognized institution and must be registered with the relevant professional bodies. He/she must have a cumulative experience of ten (10) years in similar works and must have held similar positions in at least three (3) buildings projects project.

He/she must be fluent in in written and spoken English and must have a working experience of at least 3 years in Sub-Sahara Africa.

#### ***4.8 Environmentalist***

She/he must be a registered Environmental Expert with relevant professional Body and holder of a degree in Environmental Management Studies, Environmental Engineering, Environmental science or related discipline. A Post graduate qualification in Environmental and Social Management is an added advantage. She/he must possess at least five (5) years cumulative experience in monitoring of environmental issues, initiatives and implementation of mitigation measures related to roads or airports projects. She/he must have served as an Environmental Specialist/Expert on at least three (3) projects of similar magnitude within the last ten (10) years. A working experience in Developing countries of at least 3 years is preferred and Proficient in both written and spoken English are mandatory. Proficient in Swahili is an added advantage.

#### ***4.9 Sociologist***

She/he must be a holder of Degree in Sociology, Social work, Community Development or related discipline. A Post graduate qualification in related disciplines is an added advantage. She/he must possess at least five (5) years of cumulative experience in monitoring of environmental and social issues, initiatives and implementation of mitigation measures related to roads/airports infrastructure projects. She/he must have served as Sociologist on at least three (3) projects of similar magnitude within the last ten (10) years. She/he should, ideally, have knowledge of GBV, SEA and handling of Grievance Redress Mechanism (GRM). She/he must have experience in undertaking social impact assessment and management of Health and Safety issues in accordance with the applicable laws and regulations. A working experience in Developing countries of at least 3 years is preferred and Proficiency in both written and spoken English are mandatory. Proficient in Swahili is an added advantage.

#### ***4.10 Health and Safety Officer***

She/he must be a registered with OSHA for practicing the Health and Safety Mitigation measures in work place and must be a holder of Degree or Advanced Diploma in Health Science, Social work, Community Development or related discipline. A Post graduate qualification in Health and Safety related disciplines is an added advantage. She/he must possess at least five (5) years of cumulative experiences in monitoring of Health and Safety issues in work place, initiatives and implementation of mitigation measures. She/he must have served as Health and Safety Expert on at least three (3) projects of similar magnitude and complexity within the last ten (10) years. She/he must have at least 3 years working experience

in Developing countries; and Proficient in both written and spoken English are mandatory. Proficient in Swahili is an added advantage.

#### **4.11 Support Staff**

**Project Director** – The Project Director shall guide and support the site supervision staff for the duration of the project. She/he shall be based at the Consultant’s head office and co-ordinate any specialist services that may be required from the Consultant.

In addition to the key personnel designated above, the Consultant shall provide the support and back-up staff to assist with on-site supervision of the works in the following categories:

- (i) Project Director – 1No
- (ii) Works Inspector – 1No,
- (iii) Materials Technician – 1No,
- (iv) Assistant Surveyor – 1No,
- (v) CAD Technician – 1 No.
- (vi) Network/ICT Specialist – 1 Nos
- (vii) Architect – 1No

*Note: CVs for Support Staff will not be evaluated, thus may not be submitted with the Proposals. However, evidence of professional registration and academic certificates for all Key staffs should be submitted and will be evaluated*

### **5.0 STAFF REQUIREMENT DURING DEFECTS LIABILITY PERIOD**

The Resident Engineer shall be responsible for conducting the inspection during the defects liability period as described in Sub-section 3.3 above.

#### **5.1 The Consultant’s Staff**

The Consultant’s staff shall: -

- (a) be available to move to the Works site upon the commencement of the contract;
- (b) Accord officials from the Ministry of Works and Transport the opportunity to inspect the works and the related documentation.
- (c) Inform and seek consent of the Client when traveling away from site.

Notwithstanding the above, the Consultant shall provide a suitable replacement with equivalent or higher qualifications approved by the Client in case of extended absence (more than 2 weeks) of any senior staff from site.

### **6.0 DATA, SERVICES AND FACILITIES PROVIDED BY THE CLIENT**

TANROADS will provide liaison with the Government Ministries and Departments in order to introduce the Consultant to them. However, the Consultant shall be fully responsible for collecting data and information from various departments/agencies;

**6.1 The Client will make available to the Consultant the following:**

- (a) Previous Design reports, including appendices, etc. relevant to the assignment, that have been carried out by or for the Client, Contract Document and any other relevant data available, which are necessary for the proper execution of the supervision of the construction works;
- (b) Fully furnished and equipped office space on the site for the members of the supervision team, including maintenance, water, electricity, office supplies and consumables;
- (c) One (1) Brand New 4WD long wheel base Station Wagon Motor Vehicles, and two (2) Brand New Manual Transmission 4WD long wheel base double cabin for Resident Engineer and Supervision staff;
- (d) Fully furnished office accommodation;
- (e) Materials Testing and Surveying Equipment;
- (f) Airtime for five (5) mobile phones for project communication purposes: 2Nos. for Client's engineers and 3Nos. for the Consultant's Supervising Staff.

**6.2 The Client will assist the Consultant to:**

- (a) Obtain formal consent from outside authorities or persons having rights or powers in connection with the works or the site thereof;
- (b) Obtain ministerial orders, sanctions, licenses and permits in connection with the works;
- (c) Register a non-Tanzanian firm and key staff with the Engineers Registration Board. Any associated cost will be borne by the Consultant.

**6.3 The Consultant Responsibilities/Obligations**

- (a) The Consultant shall ensure that his supervision staffs provide organized training and instructions to counterpart personnel assigned to the Project, monitors their performance and submits a quarterly progress report on each individual. Training program and reporting should be defined in the Consultants proposal and agreed with TANROADS during pre-contract discussion.
- (b) The Consultant shall ensure that all professional EHS and one Social Specialist providing services under this Supervision Contract have background training related to potential worker health and safety risks associated with this work, and provided all the necessary health and safety equipment, including applicable personnel protective equipment, to fulfill their duties. The Consultant shall also ensure that all non-ESHS personnel providing services under this Supervision contract are provided basic training

relate the Project ESHS requirements and potential significant ESHS related impacts and risks.

- (c) In the conduct of this work, the Consultant shall cooperate fully with relevant Government Ministries and Departments. The Client will provide the Consultant with data and services outlined above. The Consultant shall be solely responsible however, for the analysis and interpretation of all data received and for the conclusions and recommendations based thereon.
- (d) The consultant shall comply with this Code of Conduct and all applicable laws, regulations and other requirements, including requirements to protect the health, safety and well-being of other Experts and any other person, in compliance with good international practices and the project's Labour Management Procedures and the Gender Based Violence (GBV) Action Plan.
- (e) The Consultant shall be responsible for arranging for his support staff who will not be accommodated in the multiple accommodations provided under the works contract.

## **7.0 REPORTING**

All reports shall be submitted both in soft and hard copies.

### **7.1. Design Review Report**

The Consultant shall prepare and submit the following deliverables during the design review stage:

- (i) A Preliminary Design Review Report within 4 weeks after the effective date of the Contract. The report should provide at least descriptions and recommendations on areas that need to be modified in line with the information provided in Section 3.2 of the Terms of Reference.
- (ii) Final Design Report within 8 weeks after receiving the Client's decisions on the recommendation of the Preliminary Report.

### **7.2 Reporting During Construction Period**

#### **7.2.1 ESHS Reports**

- a) The Consultant shall provide immediate notification to the Client should any incident in the following categories occur while carrying out the Services. This is to be followed by full details of such incidents shall be provided to the Client within three (3) calendar days.
  - (i) confirmed or likely violation of any law or international agreement;
  - (ii) any fatality or serious (lost time) injury;

- (iii) significant adverse effects or damage to private property (e.g. vehicle accident); or
  - (iv) any allegation of Gender Based Violence (GBV), Sexual Exploitation or Abuse (SEA), sexual harassment or sexual misbehavior, rape, sexual assault, child abuse or defilement, or other violations involving children.
- b) Ensure that contractor immediate notifications on ESHS aspects are shared with the Client immediately and ensure the Contractor reports promptly such incidents to their insurance company, where applicable;
  - c) Immediately inform and share with the Client any immediate notification related to ESHS incidents provided to the Consultant by the Contractor, and as required of the Contractor as part of the Progress Reporting; and
  - d) Share with the Client in a timely manner the Contractor's ESHS metrics, as required of the Contractor as part of the Monthly Progress Reports.

### **7.2.2 Inception Report**

This report shall include the results of study/review of the design and contract documents, any modification or improvements deemed necessary, results of the review of the contractor's work program, any modifications thereto, status of the consultant and contractor's mobilization, ESHS Contractor requirements or other ESHS plans or documents and any other matter requiring the Client's action. This report shall be submitted in 10 copies to TANROADS one month after commencement of works contract. One copy will be sent to TANROADS Regional Manager Office – Iringa.

### **7.2.3 Progress Reports**

- (a) The Consultant shall prepare progress reports every month for the duration of the contract. These are to be submitted in eight (8) copies and should reach TANROADS not later than 15 days after the end of the month being reported. One copy will be sent direct to the TAA HQ and TANROADS Regional Manager's Office – Iringa.
- (b) The format and the content of the monthly progress reports shall be as agreed with TANROADS. The report shall include but not limited to the following:
  - i. Summary of the implementation plans and schedules for key and critical activities for the reported month;
  - ii. Progress of the implementation of key and critical activities including the percentages of completion of works items and the overall progress of the works;
  - iii. Highlight any changes on the original working documents and the reasons;
  - iv. Description of major changes on quality and quantities of Works;

- v. Descriptions of challenges encountered by the project and actions taken or suggestions on the way forward including charts representation of actual progress vs planned progress (both physical and financial);
- vi. Financial status including cash flow forecast of both Construction and Supervision Contracts;
- vii. General information on weather, breakdown of key construction equipment and plants, major accidents and other events that may or have affected the progress or performance of Works.
- viii. Identification of the working units (number of plants and labour used for the various types of works clearing earthworks, grading, etc.). The section should also include a record of the total number of working hours of every key equipment and plants;
- ix. Monthly records of days spent on the various types of works with indication of the nominal working days and the rainy days in the months
- x. Assessment of the Contractor's claims, if any

Each monthly report is also expected to highlight status of the unsolved key site or administrative challenges encountered during the previous month(s) status of environmental and social aspects of the project and the vicinity of the project, including but not limited to progress on resettlement activities, complaints received/ addressed, environmental issues, contractors' compliance with national permits/ consents requirements, etc.

#### **7.2.4 Detailed Progress Report**

When the implementation of the civil works contract reaches a value of 50% and 80% of the initial construction cost, the consultant shall prepare and submit a detailed progress report with updated cost of the civil works contract, implementation schedules and substantiate any request related to additional funding, needed for full completion of the project. The report shall be submitted in eight (8) copies to TANROADS, one copy to TAA HQ and Regional Manager TANROADS Iringa.

#### **7.2.5 Final Report**

##### **i. Project Completion Report**

The Consultant shall prepare and submit Five (5) Copies of Final Completion Report within 30 days after the Substantial Completion of Construction Works. One (1) copy of the report will be sent to the TANROADS Regional Manager's Office – Iringa and the remaining copies to TANROADS Headquarters. The report shall include among other things, as built

drawings, type, quality and quantity of materials used for construction of various sections and structures of the project and other relevant information that would enable the end user to apply or refer on future maintenance or new construction works.

The report shall also include a summary of the principal difficulties encountered during construction and the means employed to overcome them, changes (if any) made in the original designs, modifications to specifications and conditions of contract, all variation orders, assessment of claims by the Contractor, utilization of provisional sum, price variations, physical contingencies sums, cumulative monthly payments to the Contractor designated by date and number of payment certificate and break down into foreign and local currencies and including a similar payment schedule for supervision services. The details of the overall project costs (construction and supervision) with justification for any significant differences with the original shall be given in the Final Report.

## **ii. Final Completion Report**

The Consultant shall prepare and submit to TANROADS, five (5) copies of the Final Project Report and Final Account within three (3) months after the issuance of the Defects Liability and Final Payment Certificate. The Final Project Report shall include a separate volume on maintenance proposal of the respective road section.

## **8.0 PAYMENTS TO THE CONSULTANT**

### **8.1 General**

- (i) payments for undertaking the assignments as described in these Terms of Reference shall be made on monthly basis and cover remuneration for approved personnel and respective reimbursable expenses;
- (ii) the Consultant's remuneration shall be deemed to cover his statutory liabilities, travel costs and support of his Head Office including obligations other than additional services not covered by the Terms of Reference under consideration.
- (iii) The costs shall be invoiced to cover the Consultant's performance of his duties described in the Terms of Reference including the following:
  - 1. monthly remuneration and subsistence allowances for expatriate personnel;
  - 2. monthly remuneration and subsistence allowances for local personnel;
  - 3. transportation of foreign-based key personnel and local travel costs;
  - 4. reimbursable expenses concerned with the design review, production and printing reports, including associated secretarial expenses as described on paragraph 7 above;
  - 5. shipment of personal effects that are appropriate for the assignment; and
  - 6. other relevant contractual costs which must be specified by the Consultant.

## **8.2 Payments to The Consultant During the Design Review Services**

The Consultant shall build up the costs for carrying out the assignment using the forms provided in the Request for Proposal (RFP).

Payment (Lump-sum) under Design Review shall be claimed under reimbursable expenses and shall be subject to review and confirmation during the pre-contract negotiations.

## **8.3 Payments to the Consultant During Construction Supervision Services**

Payments will be made monthly as per terms and conditions of time-based contracts for undertaking the assignments described in these Terms of Reference to cover fees for approved personnel and reimbursable.

The costs shall be quoted to cover the Consultant's performance of his duties described above in accordance with the following:

### **8.3.1 Advance Payment**

An advance payment of 15% in foreign currency and 15% in local currency of the contract sum (excluding contingency allowance) shall be made within thirty (30) days after the Effective Date to cover initial mobilization costs against an equivalent amount of acceptable Unconditional Advance Payment Bank Guarantee; and

the advance payment will be set-off by the Client in ten (10) equal instalments against the statements starting from the 5<sup>th</sup> invoice for the rendered services, until an advance payment has been fully recovered.

### **8.3.2 Reimbursable Expenses**

Reimbursable expenses, which cover all out of pocket expenses and shall be made against contractual acceptable documentary evidence, as agreed with the Client.

## **8.4 Other payments**

No other payments will be made to the Consultant under this contract.

## **9.0 DURATION OF THE ASSIGNMENT**

The duration of the Design Review and Construction Supervision, and Defects Notification Period are 18 and 12 months respectively. The Contract shall start on the term expressed in the General Condition of the Contract and shall be terminated when the final inspection of the works at the completion of the Defects Notification Period has been done and the Consultant has fulfilled all of his obligations.

## **10.0 LEAVE**

The Consultant's expatriate staff engaged in the supervision of the construction Works will be entitled to 30 days leave per calendar year. In connection with leave, the expatriate staffs are entitled for one round trip international travel per year, for which the Consultant will be reimbursed. Man-months during annual leave will not be paid. During the absence of leave the staff's duties shall be handed over to an appropriate staff, of equal or better qualifications, approved by the Client.
